The Official Magazine of the LEGO® Club

SPRING 1986

Volume 3 No. 4

President's Letter

Dear Members,

I hope you enjoy reading about the fantastic LEGO Tower we built on Waterloo Station. There's something magic about creating a new World Record isn't there?

Mind you, actually getting it built within just 24 hours was quite a challenge, and at 50 feet high it really was a whopper.

If it looks high when seen from the ground, believe me it looked a lot

higher when you were up the top there, leaning out to put another section in place, with the tower swaying one way and the platform of the hydraulic lift swaying another. I know, I was up there! Exciting stuff!

And, as part of a fund-raising event with Thames TV, it is nice to know that our efforts helped raise money for children's charities isn't it?

Clive Nicholls Club President

LEGO Tower Sets World Record

Record Breakers...

As part of Thames TV Telethon appeal for children's charities, LEGO UK decided to attempt the World's Tallest LEGO tower in 24 hours. This attempt took place at Waterloo Station along with other record attempts under the watchful eye of Norris McWhirter from the Guinness Book of Records.

Eric Sykes arrived about 4.30 p.m. to lay the first brick, then everyone on the station was invited to help. Commuters, children, policemen, railway workers, and TV personalities all came along to help.

Chris Tarrant and Sarah Greene from Thames TV kept television viewers in touch with reports from Waterloo as the tower grew steadily. Work continued through the night with many people staying to help build.

UP TO THE ROOF

By 11 a.m. next morning the tower was almost complete and we were just waiting for Norris McWhirter to come and put the final section on the top to take the tower right to the station roof at 15.1 metres. Mr. McWhirter also verified that we had set a new Guinness Record for the World's Tallest Toy Construction completed in 24 hours. This new record will appear in the 1987 edition of The Guinness Book of Records to be published in October 1986.

£5000 CHEQUE

When the tower had been completed LEGO UK's Managing Director, Peter Eio, and Model Builder Duffy presented Chris Tarrant with a huge LEGO cheque (even that was built from LEGO Bricks). Our sponsorship of the tower raised over £5,000 for the appeal which at the last count had raised nearly £3,000,000 for children and youth's charities.

The LEGO PRIZE

The new International LEGO Prize worth 750,000 Danish Kroner (£60,000) was awarded for the first time to The Save the Children Fund at a special prize giving ceremony in our Danish Headquarters in Billund last November.

Nominations for the award are made by LEGO Companies from all over the world. Over 30 nominees were considered this year and the nomination from LEGO UK Limited was declared the winner.

The Save The Children Fund was selected for its outstanding efforts to improve the conditions under which children live, through research, education and famine relief. Two particular projects were chosen to share the prize money. £40,000 went to the Khemisset School for handicapped children in Morocco and £20,000 to the Trinity House Family Centre in Manchester.

THE
LEGO PRIZE

For an interplay contribution
towards the improvement of conditions under
which children live and grow up.

LEGO is a trademark
of the LEGO Group of Denmark

In Norse mythology, Ygdrasil is the Tree of Life. The giant ash, which is ever green and embraces the whole world.

From its roots deep down in the underworld to its crown reaching higher than the sky, Ygdrasil is home to all life—gods and giants, man and beast. Mythological characters who live in Ygdrasil include a ferocious wolf Fenris and the fearsome sea monster Midgaardsormen.

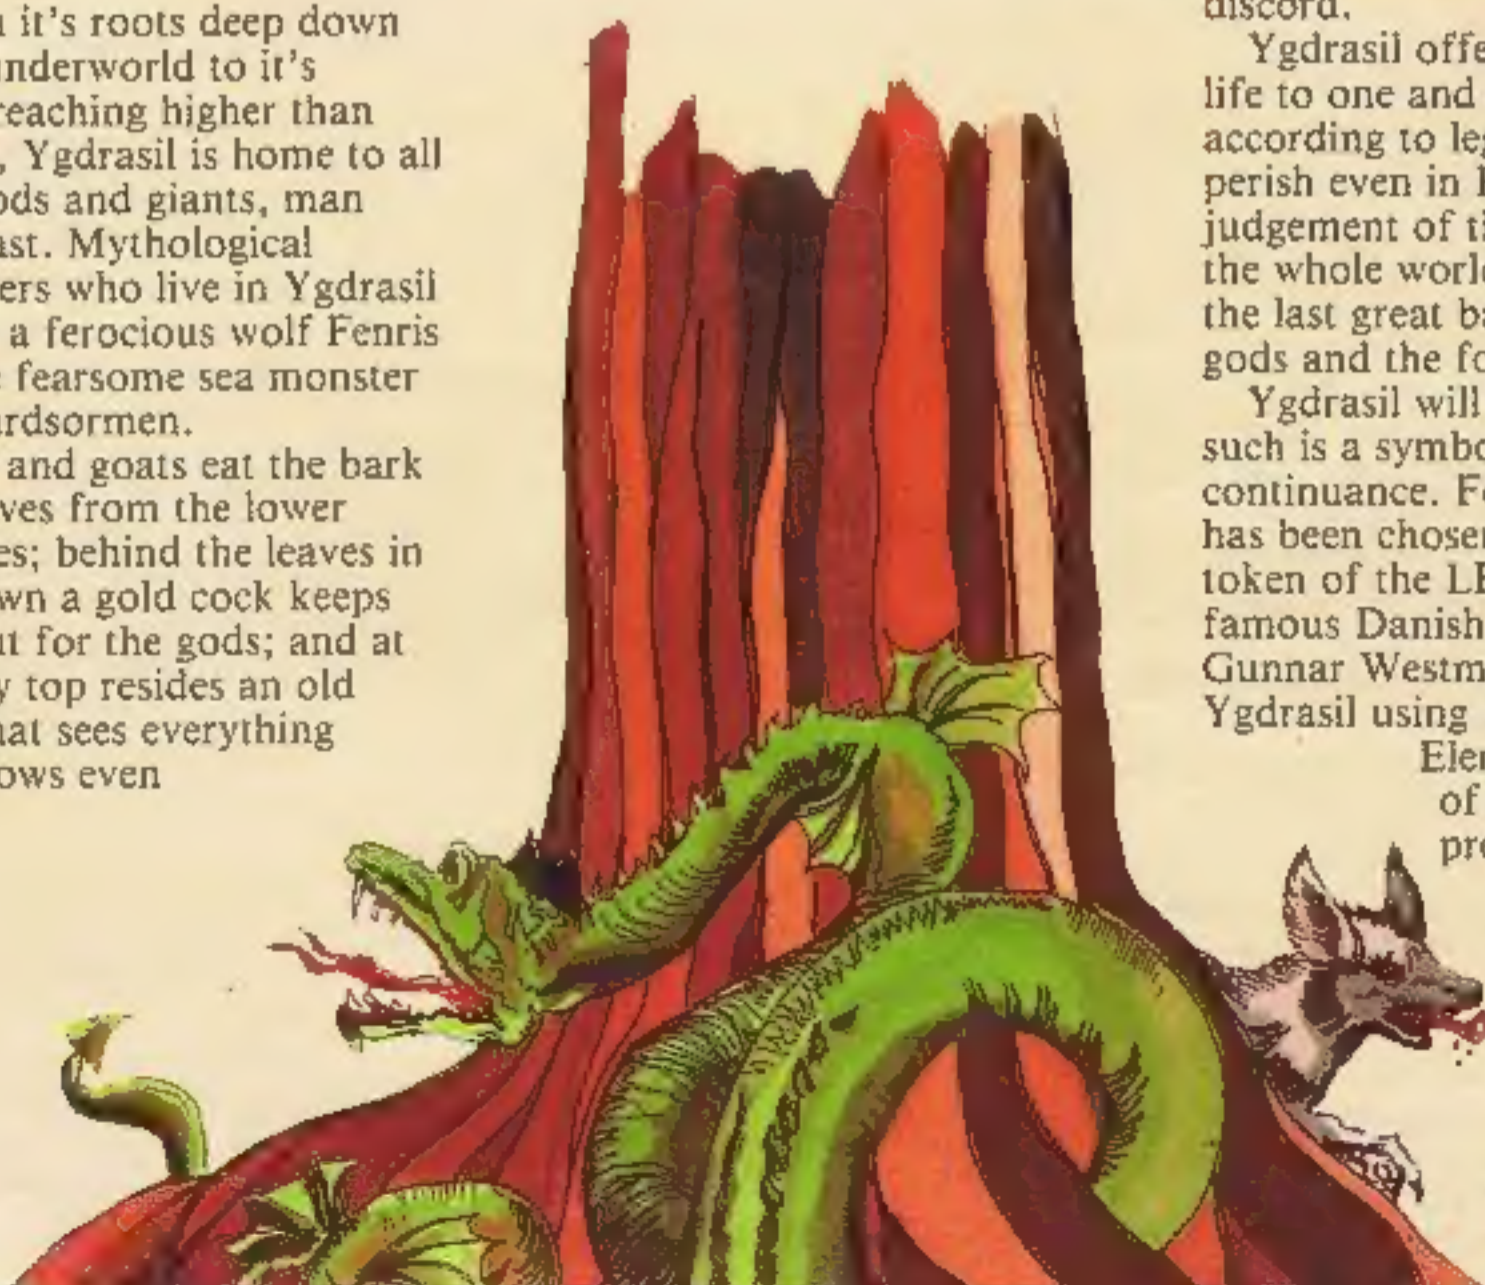

Deer and goats eat the bark and leaves from the lower branches; behind the leaves in the crown a gold cock keeps look out for the gods; and at the very top resides an old eagle that sees everything and knows even more.

YGDASIL

Nidhug an evil-minded snake, gnaws at Ygdrasil's roots and Ratatosk the squirrel, races up and down the trunk bringing the latest gossip from the eagle to the snake to keep them in discord.

Ygdrasil offers shelter and life to one and all and according to legend will not perish even in Ragnorak—the judgement of the gods—when the whole world goes under in the last great battle between the gods and the forces of evil.

Ygdrasil will remain and as such is a symbol of life's continuance. For this reason it has been chosen as a visual token of the LEGO prize. A famous Danish sculptor, Gunnar Westmann, has built Ygdrasil using 183 basic LEGO Elements and a copy of his original is presented to every winner of the LEGO Prize.

15 NEW LEGOLAND
TOWN Sets for Easter

Easter Excitement!

Two Great Competitions as well

Do you notice anything special about the big LEGOLAND Town picture shown here? Yes, you've guessed it—every one of the models shown is new. And they'll all be in the shops in time for Easter so there's lots of new sets to choose from if you are wanting to add to your collection. There are **improved models**, like the Petrol Station and Fire Station.

There are **new models** like the TV Camera Car, the super Power Boat with its own transporter and the terrific Mobile Crane with its extending jib.

And there's a **new play idea** too—the Riding School and the Horse Box.

In many toy shops over Easter you will find special "dump-bin" displays full of these new sets, with **FREE** entry forms for not one but two competitions to enter.

The prize for one competition is a trip to see the Austrian Grand Prix Formula 1 race this summer. The prize for the other is a family horse riding holiday for a week in Dorset.

If you are interested in car racing and horse riding you can enter both—and might even win both! Anyway, there are lots of runner-up prizes too, so look out for these competition entry forms in the shops over Easter.

A Special Easter Gift for You... A Free 40p Voucher...

Not only are there lots of new sets and two great competitions, but you could even get a free voucher worth 40p against the purchase of any LEGO sets you may want to make over Easter.

Look for this voucher on the cover of a special LEGO leaflet which will be inserted in copies of TV Times magazine for the Easter holiday programmes.

Look for this leaflet in the TV Times Easter issue.

You can be a giant on your LEGOLAND® holiday

If you like LEGO you'll love the amazing LEGOLAND Park. It's a land where children can really feel like giants. It is in fact one of the world's most fascinating miniature towns and fun parks.

LEGOLAND is in Billund, in the middle of Denmark, a country where the whole family can have fun. There's lots of beaches, fairy tale castles, super museums and 'Wonderful Copenhagen' with its own famous Tivoli pleasure park.

**UP TO 50%

▲ **Nicky Willis (10)**
built this sailing ship which has two decks inside.

Picnic on the River Bank

by John Duffield (LEGO Model Designer)

"The Mole had been working very hard all the morning, spring-cleaning his little home. First with brooms, then with dusters; then on ladders and steps and chairs, with a brush and a pail of whitewash; till he had dust in his throat and eyes, and splashes of whitewash all over his black fur, and an aching back and weary arms. Spring was moving in the air above and in the earth below and around him, penetrating even his dark and lowly little house with its spirit of divine discontent and longing. It was small wonder, then, that he suddenly flung down his brush on the floor, said 'Bother!' and 'O blow!' and also 'Hang spring-cleaning!' and bolted out of the house without even waiting to put on his coat."

Hello Chums...

This was how Moley started his adventure in *Wind in the Willows*—one of my favourite books. After a long dark winter, off he went to discover the world outside.

—First he discovered 'The River'—Oh my!
—Then he met The Water Rat who owned a thing called 'A Boat'—Oh my! Oh my!

Ratty took him on a trip down 'The River' to have a picnic. In 'the boat' he packed a fat, wicker luncheon basket.

"What's inside it?" asked the Mole, wriggling with curiosity.

"There's cold chicken inside it," replied the Rat briefly: "coldtonguecoldhamcoldbeefpickledgherkinssaladfrenchrollscressandwidgespottedmeatgingerbeerlemonadesodawater—"

"Oh stop, stop," cried the Mole in ecstasies: "This is too much!"

"Do you really think so?" inquired the Rat seriously. "It's only what I always take on these little excursions."

Don't forget

LEGO World Show

Calling all members who live in or near Glasgow.
The LEGO World Show "Inventions" will be in Lewis's Department Store, Glasgow over Easter.

The show includes 18 models of inventions, some famous and some anonymous, from the wheel invented about 5000 years ago, to the Internal Combustion Engine patented by Nikolaus A Otto in 1876. Each model has its own display stand which gives details of the inventor and the background to the invention.

The centrepiece of the show will be "Summer Fantasy" a magical garden with lots of moving models. There will also be displays showing all the LEGO ranges and a LEGO shop.

The Camera

Louis Daguerre and Joseph Nicéphore were the first to make durable black/white photographs—in 1826. In those days, it took approximately half an hour to take a black/white photo. The customers had to sit perfectly still with their heads held firmly by a metal clamp. Today it is all much easier: it takes only a fraction of a second to snap both black/white and colour photos.

This early camera is just one of the fantastic models of inventions on display at the LEGO World Show.
